

The image is a background architectural rendering of a modern building. It features a mix of materials: dark brown brick on the lower left and right, and a section of light-colored corrugated metal siding in the center. The building is set against a light green and white geometric background. The title 'The Andreu Building' is prominently displayed in the upper right corner.

Engineering NYU Tandon

PROJECT OBJECTIVE

Reconstruct the Jacobs Administration Building

sustainable & innovative
hub for the engineers of
the future

- Open exterior
- Elevated green space
- Locally engaging
- For students by students

BENEFICIARIES

- Students' academic development
- Professional researchers
- Brooklyn community
- Local businesses

PRODUCT DESCRIPTION

The Andreu Building is in competition with construction companies across the city

Unique Components:

- Vendor Leasing
- Green Space Technology
- Café and Seating
- Well Spaced Open Areas

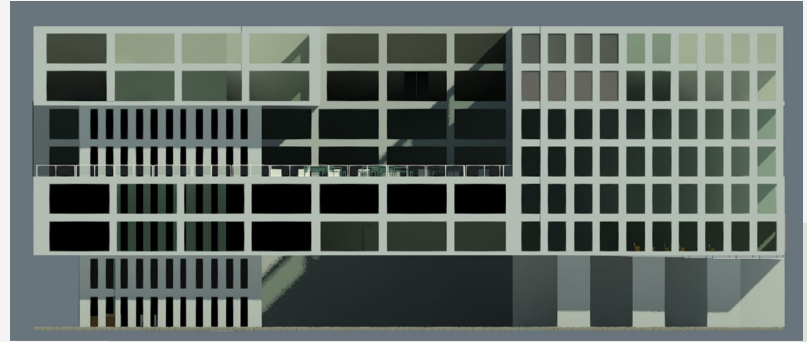

Figure 1: Front Exterior of Andreu Building in Revit

Total Cost: 28 Million Dollars

- NYU's most recent Paulson Building priced at 1.2 Billion (WSN, 2023)

PRODUCT DESCRIPTION

LEED Platinum Rating:

- Advanced Security
- Solar Heat Gain Reducing Windows
- Smart LED Lighting
- Transportation Friendly
- Reusable Rainwater System
- Heat Island Reduction

VIDEO

CONCLUSION

The LEED Platinum Andreu Building revamps
the entirety of Tandon

Figure 2: Green Space Exterior of Andreu Building in Revit

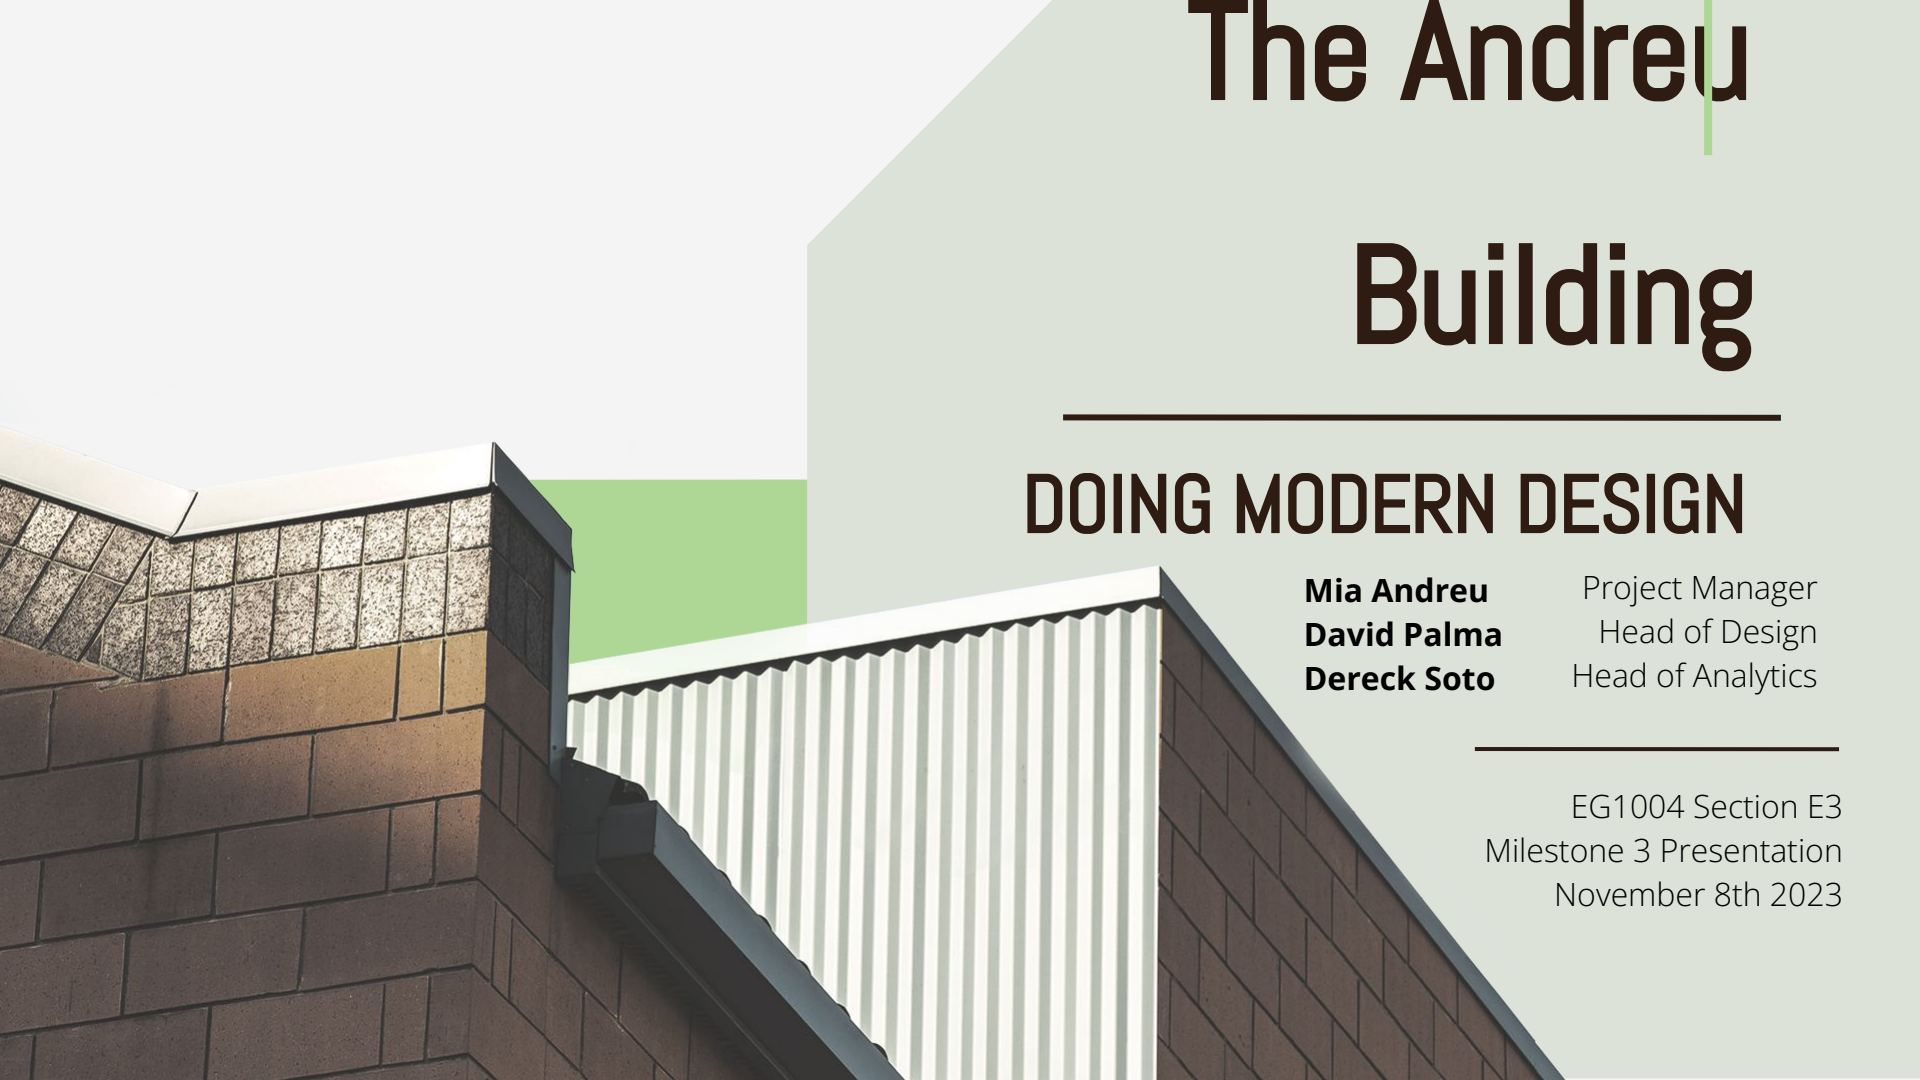

- Intricately designed for a notable look
- A timeless addition to NYU's architecture

BUILDING TODAY FOR TOMORROW

- A leap forward for sustainable energy initiative
- Fosters communal engagement
